

## MetaWrx™

SMART ARCHITECTURE / LOW PROFILE / HIGHLY EFFECTIVE

IDEAL WHEN BOTH TRANSMITTED NOISE AND REFLECTED VIBRATION  
MUST BE SUPPRESSED.

**MetaWrx** is the perfect solution to improve user experience in fitness facilities, dance studios, performing spaces, and adjacent spaces using lightweight low-profile floor build-ups.

MetaWrx is a technological leap in the formulation of floor isolation: engineered to dramatically reduce structure-borne vibration and shock energy transmission from source to receiver. Using MetaWrx for floor isolation improves the quality of user experience both in and outside of the room where shock, noise, and vibration occur.

### MetaWrx Works:

#### Meet the Industry-Leading, Low-Profile Isolator for Lightweight Build-up Applications

- Superior shock, vibration attenuation
- Repeatable performance
- Broad material and temperature compatibility
- High load bearing
- Long lifespan despite extreme abuse and conditions
- Easy installation
- Maintains lifelong architectural properties and performance
